

Final Project Report and Program

DUE: Friday by 11:59pm EST at the end of Week 10

In addition to carrying out the project, you must write a final project report. In this report, you should

- Describe the data and its source(s), including any preprocessing
- Describe your methods of analysis, including the questions that will be answered, in what fields the data will be used, and what the resulting output will be
- Include an overall description of the program, especially any special processes you did.
- The results you achieved – include these results or a summary of the results in your report with an analysis of those results.
- If your project is a group project, describe the tasks and roles of each member of the group
- **Draw conclusions from your results about your data**

What to Submit

1. The project report (Word document or PDF document)
2. The Python jupyter notebook, documented with comments
3. The output(s) of the program. (may be included in your report and/or jupyter notebook)
